POLICY TITLE: **Installation & Security for Wireless Communications**

POLICY STATEMENT:

Agencies and departments who provide network connections between buildings using wireless communications devices have the following responsibilities:

The agency/department in conjunction with Buildings & General Services¹ must ensure that devices put on roof tops or mounted externally on a building are in compliance with local zoning and/or Act 250 requirements;

The agency/department must ensure that they include a provision for the maintenance and removal of the devices;

The agency/department must file an approved security plan with the CIO's office prior to installation of such devices. Security plan must include frequency used by wireless devices.

PURPOSE/COMMENT: The intention of this policy is to reduce risk to government entities by enforcing the implementation of security associated with wireless communication devices.

¹ Department or Agency must work with Buildings on any concerns with leased or state owned property that could have historic value or any other requirements.
